***Claim Rejection under 35 U.S.C. 103(a)***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7,9,10,14,15,18,20-22,24,25 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 08092003; 4/9/96 and Shafer et al (US 5500403; 3/19/96). JP '003 teaches a process for keeping cut flowers fresh comprising applying to the cut flowers a composition comprising an antibacterial compound and a polymer. See abstract. JP '003 does not teach the application of sugar to cut flowers. However, Shafer teaches a process for keeping cut flowers fresh comprising applying to the cut flowers a composition comprising dye, sugar and an antibacterial compound. See abstract, column 3 line 5 - column 4 line 40. It would have been obvious to one having ordinary skill in the art to treat cut flowers with the composition taught by JP '003 then with the composition taught by Shafer. One would have been motivated to do this since both methods are individually taught to keep cut flowers fresh. The references do not disclose the instant a) nm particle size and b) properties of the polymer - vapor transfer rate, transition temperature. One having ordinary skill in the art would optimized the particle size through routine experimentation. Transfer rates and transition temperatures of polymers are well known in the art

Art Unit:

***Double Patenting Rejection***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CAR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CAR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CAR 3.73(b).

3. Claims 1,8,26 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,28 of copending Application No. 09759385. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications claim very similar systems.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit:

***Claim Objection***

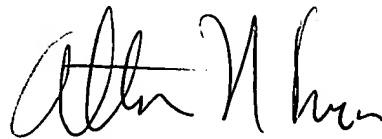

Claims 11-13,16,17,19,23,27,28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Telephonic Inquiry***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton Pryor whose telephone number is (703) 308-4691. The examiner can normally be reached on Monday through Friday from 8:00 a.m. to 4:30 p.m.
